   "2013-2015:   Gel Creative - Head Web Developer (Barrie, ON)"];

RyanAmalfitano.Featured_Projects = [
   "Project Social (projectsocial.ca)
      Project Social is all about making connections. I developed
      this website in Spring 2020. It features some of the usual
      WordPress fixings, such as visually rich pages of content
      and a categorized blog. It also has an events calendar, an
      Instagram feed in the footer, and some additional CSS
      animations to spice things up.",

   "Born Legacy (bornlegacy.ca)
      Born Legacy is a not-for-profit organization that focuses
      on helping abused and disenfranchised women regain control
      over their lives. The site's design was heavily influenced
      by the two creators and boasts a unique style. It features
      light, colourful blocks of content and stories from the
      founders about their experiences. It also features a blog,
      calendar, and events page, and focuses on providing hope
      and confidence to women."];
